

RESEARCH ETHICS SECTION KLD-RES-04-001: PROTOCOL REVIEW WORKSHEET

Version No: MM/DD/YY

Date of Approval: MM/DD/YY

Effectivity Date: MM/DD/YY

Title of the Study			
RES Code		Type of Review	
Proponent/Project/Study Leader		Institution	
Reviewer		Date Receive	
Guide questions for reviewing for reviewing the proposal/ protocol	NO	YES	Unable to Assess
1. Does study have social value?			
Comment: (e.g. scientific value, relevance to national /community needs)			
2. Is the study background adequate?			
Comment:			
3. Are the research questions supported by the Review of Literature?			
Comment:			
4. (For pure Qualitative) Are the study objectives having Credibility, Transferability Dependability, Feasibility, Flexibility, Confirmability?			
(For pure Quantitative, systematic literature reviews (SLRs), and others) Are the study objectives Specific, Measurable, Attainable, Realistic, Time-bound?			
Comment:			
5. Is the research design appropriate? - Is the population identified and defined? - Is the selection of study participants described? - Is the sample size justified? - Is the plan for data analysis described? - Are there dummy tables?			

RESEARCH ETHICS SECTION KLD-RES-04-001: PROTOCOL REVIEW WORKSHEET

Version No: MM/DD/YY

Date of Approval: MM/DD/YY

Effectivity Date: MM/DD/YY

Comment:			
6. Does the research need to be carried out with human participants?			
Comment:			
7. Does the study have a vulnerability issue?			
Comment:			
8. Are appropriate mechanisms/interventions in place to address the vulnerability issue/s?			
Comment:			
9. Are there risks/probable harms to the human participants in the study?			
Comment:			
10. Are there measures to mitigate the risks?			
Comment:			
11. Is the informed consent procedure/ form and culturally appropriate?			
Comment:			
12. Is/are the investigator/s adequately trained and do they have sufficient experience to undertake the study?			
Comment:			
13. Is there a disclosure of conflict of interest?			
Comment:			
14. Are the research facilities adequate?			
Comment:

PART I: RESEARCH SUMMARY

(Fill up the applicable parts based on the nature of the research study.)

I. Rationale and Significance of the Study

II. Statement of the Problem

- Specific Problems
- Specific Objectives

IV. Theoretical or Conceptual Framework

V. Methodology

- Research Design
- Study Population
- Inclusion Factors
- Exclusion Factors
- Methods / Data Collection Procedure
 - a. Requirements Gathering
 - b. System Design & Development (If applicable)
 - c. Testing Phase (If applicable)
 - d. User Acceptance Testing (UAT) (If applicable)

VI. Ethical Considerations

- Informed Consent
- Confidentiality
- Privacy and Data Protection
- Voluntary Participation
- Risk Minimization/ Management
- Anonymity of Respondents
- Data Privacy Act Compliance
- Data Access Authorization

RESEARCH ETHICS SECTION KLD-RES-04-001B: RESEARCH ETHICS COMPLIANCE AGREEMENT

Version No: MM/DD/YY

Date of Approval: MM/DD/YY

Effectivity Date: MM/DD/YY

V. Data Management and Analysis Plan

- Data Collection
- Data Security During Collection
- Data Storage
- Data Analysis Plan
- Data Retention
- Data Disposal

VI. Compensations, Reimbursements, or Entitlements (If applicable)

VII. Recruitment Procedures (If applicable)

RESEARCH ETHICS SECTION KLD-RES-04-001B: RESEARCH ETHICS COMPLIANCE AGREEMENT

PART II: RESEARCH ETHICS COMPLIANCE AGREEMENT

The researchers fully understand and agree that:

- a. the study has not yet been implemented and is not yet at the data-gathering stage involving human participants, clinical data, laboratory samples, or health-related records;
- b. the study has not been submitted to any other local or institutional ethics review committees or boards in the Philippines or in any other country;
- c. the researcher is required to respond to the comments, revision of the research protocol, and guarantees that the study is implemented exactly based on the approved version only;
- d. the section may conduct inspections and may ask for the copy of research documentation, data collection tools, or study-related information to ensure compliance;
- e. the use of Certificate of Research Ethics Clearance may be void and validity will not occur due to the following:
 - Falsification or concealment of information
 - Unofficial modifications to the approved protocol/research
 - Involvement in unethical research practices
 - Failure to comply with the conditions of the RES
- d. the researcher acknowledges that the institution, college, university, publisher, or funding agency may be formally notified in the event of any ethical violations.

Guide questions for reviewing the informed consent process and form.			
Is it necessary to seek the informed consent of the participants? If NO , please explain: <i>(answer briefly)</i> _____ _____ _____			
if YES are the participants provided with sufficient information regarding: <i>(Please put (/) in the answer.)</i>	NO	YES	
Purpose of the study?			
Expected duration of participation?			
Procedures to be carried out?			
Discomforts and inconveniences?			
Risks (including possible discrimination)?			
Random assignment to the trial treatments?			
Benefits to the participants?			
Alternative treatments/ procedures?			
Compensation and/or medical treatments in case of injury?			
Who to contact for pertinent questions and/ or for assistance in a research- related injury?			
Refusal to participate or discontinuance at any time will involve penalty or loss of benefits to which the subject is entitled?			
Extent of confidentiality?			

RESEARCH ETHICS SECTION KLD-RES-04-002: INFORMED CONSENT CHECKLIST

Version No: MM/DD/YY

Date of Approval: MM/DD/YY

Effectivity Date: MM/DD/YY

Is the informed consent written or presented in simple language that participants can understand?		
Does the protocol include an adequate process for ensuring that consent is voluntary?		
Do you have any other concerns?		

Recommendation:

☐	Approved
☐	Minor revision/s required
☐	Major revision/s required
☐	Disapproved

Effectivity Date: MM/DD/YY

This form is duly created to assist faculty and students in securing informed consent from the participants/ respondents of the study. It is a mandate of the Research Office to use this form whenever the researcher/s opt to use humans as participants/ subjects of the study. This form is also considered as a protection for both the researchers and the participants/ respondents. This form is a template only and can be revised/shortened if all Part I is indicated.

Title of Study :

Name of Researchers :

Institute/Unit :

PART I: INFORMATION SHEET

Introduction

Introduce to the participants/ respondents the research and proponents in concise terms. Highlight the scientific value and social significance of the study. Assure that words or terminologies are comprehensible in layman's term and participants/ respondents are given time to reflect and ask inquiries/questions/concerns.

Purpose of Research

Discuss the nature and objectives of the study. You may use local beliefs and knowledge in explaining the purpose in local terms and in non-jargon. If scientific terms and professional jargon are used, make sure that it will be explained in non-technical terms.

Type of Research Intervention

Inform the participants/respondents of potential discomfort or sensitive treatment during the study – if applicable. Treatments and experiments must be explicitly and clearly explained.

Participant Selection

Emphasize why they are selected in the study and the importance of their participation/response.

Voluntary Participation and Rights to Refuse or Withdraw

Indicate that participation is voluntary, and they can choose whether to participate or not. Also, state that they can withdraw any moment in the study, and there will be no sanctions. Assure that participation will not affect their occupation-related evaluation such as job performance, class grades, etc.

RESEARCH ETHICS SECTION KLD-RES-04-003: INFORMED CONSENT

Version No: MM/DD/YY

Date of Approval: MM/DD/YY

Effectivity Date: MM/DD/YY

Voluntary Participation and Rights to Refuse or Withdraw

Indicate that participation is voluntary, and they can choose whether to participate or not. Also, state that they can withdraw any moment in the study, and there will be no sanctions. Assure that participation will not affect their occupation-related evaluation such as job performance, class grades, etc.

Procedures

Chronologically list all procedures - pre, during and post intervention - that will be done during the study.

Duration

Indicate the time allocated for participation/ responding to interviews or survey questionnaire. Indicate also if there are follow-ups.

Risk

Describe and explain the probable risk that the respondent(s) or participant(s) may encounter. As always, the risks should be customized to the issue and scenario, considering the nature and type of qualitative intervention. Describe the steps you are taking to reduce the identified risks.

Benefits

As a result of answering a different research question, benefits may be split into three categories: individual benefits, community benefits, and societal benefits. Describe the type of benefit the participant will receive, such as a gift certificate, token, cash reimbursement, education, or new knowledge.

Reimbursement

Make it very apparent that the only compensation the participants will receive is for the costs they expended in connection with their participation.

Confidentiality

Describe the procedures the study team will follow to ensure data confidentiality, both for participant information and information the participant contributes. Describe any limitations on confidentiality. Inform the participants that since the research is doing something unusual, those who participate in it are likely to be more easily recognized by the community and, as a result, more likely to be stigmatized. Advise the participant of any additional safety and confidentiality measures you plan to implement if the study is sensitive and/or includes extremely vulnerable individuals.

RESEARCH ETHICS SECTION KLD-RES-04-003: INFORMED CONSENT

Version No: MM/DD/YY

Date of Approval: MM/DD/YY

Effectivity Date: MM/DD/YY

Sharing the Results

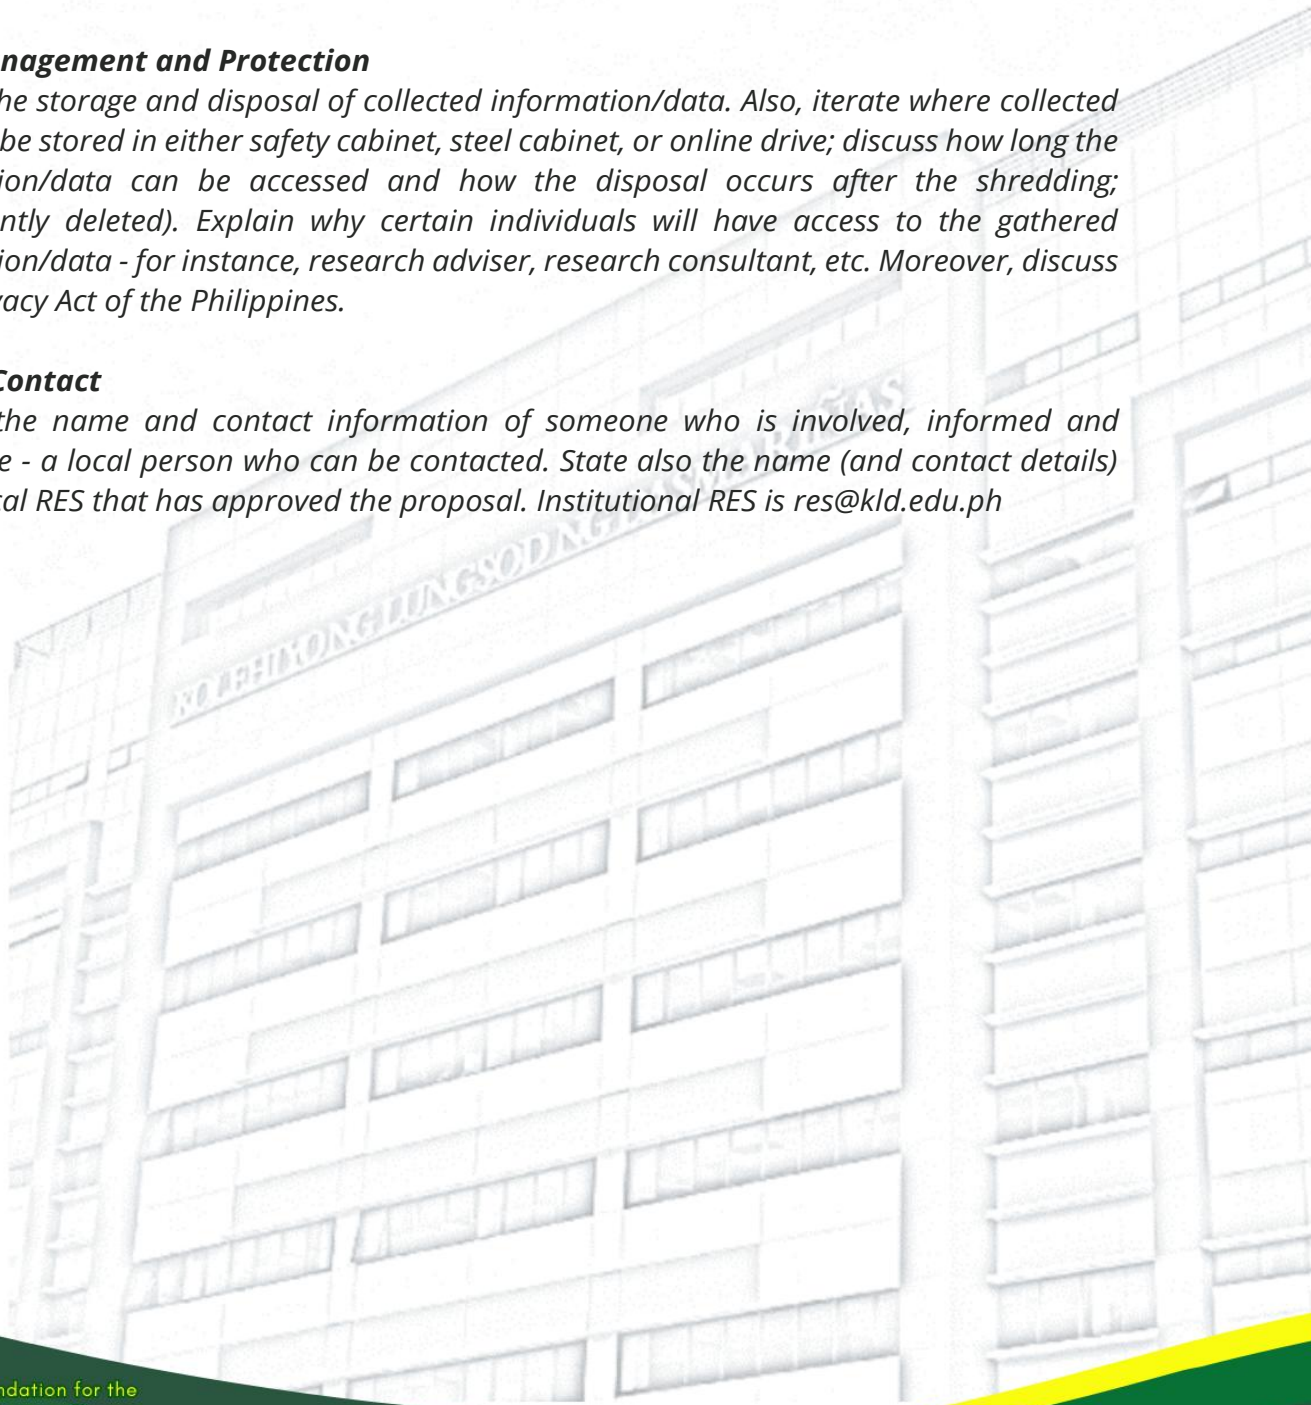

Explain how the results will be shared and who will have access. Discuss also the extent of sharing results to a broad body such as publications and conferences.

Data Management and Protection

Discuss the storage and disposal of collected information/data. Also, iterate where collected data will be stored in either safety cabinet, steel cabinet, or online drive; discuss how long the information/data can be accessed and how the disposal occurs after the shredding; permanently deleted). Explain why certain individuals will have access to the gathered information/data - for instance, research adviser, research consultant, etc. Moreover, discuss Data Privacy Act of the Philippines.

Who to Contact

Provide the name and contact information of someone who is involved, informed and accessible - a local person who can be contacted. State also the name (and contact details) of the local RES that has approved the proposal. Institutional RES is res@kld.edu.ph

Effectivity Date: MM/DD/YY

PART II: CONSENT CERTIFICATION

I have read the preceding information, or it has been read to me. I have had the opportunity to ask questions about it, and any queries I have raised have been satisfactorily answered. I hereby provide my voluntary consent to participate as a research study participant.

Respondent Code Number:

Print Name of Participant

Signature of Participant

Date (MM/DD/YY)

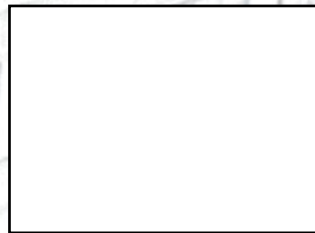

If Illiterate/Visually Impaired

I have observed the precise presentation of the consent form to the potential participant, who has been given the chance to inquire. I affirm that the individual has provided consent willingly.

Print Name of Witness

Signature of Witness

Date (MM/DD/YY)

Thumbprint of the Participant

For Researcher

I confirm that I have thoroughly discussed with the individual mentioned above the nature and objectives of the research, outlining its potential benefits as well as any possible discomforts associated with participation. Additionally, I have addressed all queries and apprehensions raised by the participant to the best of my capabilities. I affirm that there has been no coercion involved in obtaining consent, and it has been given freely and voluntarily.

A participant has been given a copy of this Informed Consent Form.
